

Warwick Applefest 2010 Photo Workshop

This unique workshop experience will focus on improving your ability to capture great macro, landscape, and photojournalistic images. Our photo school experts will join you for the day to review camera settings, techniques, and common accessories you will be able to use immediately in your photography. We'll show you how to tell a story with your photos, and review concepts of eye-catching composition and photo design. The workshop will begin with an overview of concepts as well as ideas for great shots. Best of all, after the workshop, we will have a class critique so you can get feedback on your images.

This class is for users of any brand camera. A digital SLR with at least one zoom lens and a high capacity memory card are recommended. Advanced point and shoot cameras with longer zooms and standard manual settings (P,S,A,M) are acceptable. Information will be presented assuming you are comfortable with the basic operations of your camera.

Cost: \$69.99

(no coupons or discounts may be applied)
